FINISH: Smooth with fine speckles

ST-104 ~ ST108

MODERN TASTE

The Tooth Stool draws inspiration from the natural form of a tooth, transforming a playful concept into a functional and artistic piece of seating. Meticulously crafted from UHPC (Ultra-High Performance Concrete), this stool provides outstanding strength, durability, and weather resistance, making it suitable for both indoor and outdoor use over many years. Its smooth surface is enhanced with fine speckles, creating subtle texture while maintaining a sleek and contemporary appearance.

The neutral beige-white color allows for seamless integration with a variety of interior design styles, from minimalist modern to eclectic artistic spaces. Beyond its function as a comfortable seat, the Tooth Stool serves as a sculptural element that adds character and intrigue to any environment. It is ideal for homes, galleries, public spaces, or outdoor patios, offering both practicality and a distinctive visual presence.

Flower pot Series XI

PLANTERS

Imagine stepping into a space where every detail conveys calm and vitality. The smooth terrazzo surface of these planters, with a deep blue base and lively scattered flecks, draws the eye with subtle movement and depth. The carefully distributed aggregates create texture and a sense of life, making each piece truly unique.

Whether placed indoors or outdoors, in residential gardens, boutique stores, or commercial terraces, these planters enhance their surroundings with elegance and charm. Available in a variety of finishes and color variations, they allow designers and homeowners to harmonize them seamlessly with any environment, bringing both aesthetic appeal and practical functionality.

Art Concrete Countertop

DURABLE FOR MODERN INTERIORS

This art concrete countertop combines practical functionality with modern design aesthetics. The smooth, polished surface provides a refined tactile experience while ensuring long-lasting durability. Ideal for kitchens, bars, and contemporary interior spaces, each piece can be customized to meet specific design requirements and color preferences.

Art concrete countertops are durable, easy to maintain, and suitable for high-use spaces. The material is safe.

SCOPE OF APPLICATION:

Suitable for office desks, reception counters, bar tops, kitchen countertops, and hotel bathroom vanities. Ideal for both standard projects and customized applications.

Compact, green-toned countertop with subtle terrazzo texture, ideal for refreshing bathroom interiors.

06 SK-103

WHITE SPECKLED COUNTER

Minimalist white countertop with fine speckled surface, combining simplicity with delicate texture.

07 SK-104

PREMIUM BATH COUNTER

High-end bathroom countertop with integrated basin, sleek design, and durable art concrete finish.

MODERN TASTE

The Earth Sink is a cylindrical art concrete washbasin that brings a raw, natural texture to any interior or exterior space. Its earthy tones of sand, stone, and clay provide a warm, grounded feeling that complements modern and traditional environments alike. Perfect for boutique stores, shopping malls, residential bathrooms, or outdoor handwashing stations, each piece is carefully crafted to balance aesthetics with practical functionality.

The rough yet refined surface adds a tactile dimension, while the durable UHPC or GRC material ensures longevity, resistance to wear, and ease of maintenance. Designed for both standardized production and customizable applications, the Earth Sink can adapt to diverse spatial requirements and design preferences, making it an ideal choice for both private and commercial projects.

DESIGNER'S CHOICE
